Product Name :
Structures Test Frame

Product Code :
LBNY-0005-1390002

Description :

The frame has specially designed slots and self-positioning nuts that hold the Structures experiments and instruments. This fixing system is quick and easy to use. It allows students to change, position and secure each experiment.

A lightweight yet strong bench-mounting frame that holds interchangeable experiment modules and instrumentation from the All Structures Tester range.

Adjustable feet support the frame to allow students to level the apparatus before use.

Supplied in kit form with instructions for use and a text book.

Technical Specification :

Features:
