Product Name:

Electro Hydraulic Servo Universal Testing Machines

Product Code: LBNY-0005-1420002

Description:

Features:

Support for multi-language user-interface extendibility.

Automatic requesting for testing result data, also capable of launching an advanced analysis to inspect the data. As many as 20 layers of sensor linear compensation, elevates the precision of the instruments to the next level. Complies with standard requirements of torsion and compression, as well as a variety of destructive, non-destructive and multi-cycle tests.

Support for multi-level elastic modulus tests.

Closed loop control of channels such as load, displacement, deformation, etc. Smooth switching in between. Rounding off of numerical testing data complies with Rules of Rounding Off for Numerical Values, supports

rounding off in sections and custom rounding off.

Dynamic display of load, displacement, deformation and real-time testing curve on the screen.

Characteristic testing data can be marked on testing graphs.

Capable of statistical operations on testing data (average, standard deviation, coefficient of variance).

Capable of re-analyzing test data and curves, and partial zooming of testing curves at will.

Support saving, instant retrieving and inspection of testing results.

Support Excel report templates and customized editing of test reports.

Technical Specification:
