Product Name :
Special Weight Length Minus Tolerance Measuring With High Precision Test Equipment

Product Code :
LBNY-0005-1450002

Description :

Integrated with safety barriers, travel limit protection and full scale protection.
Safety barriers are installed at two sides of the working table to ensure the safety of operators.
Intuitive display of length and weight.
Support for saving, instant retrieving and inspecting measurement data.
Integrated with non-contact laser measurement, improving the precision and reliability of measurement data.
Completely automatic measurement process. Place the component on the V-shaped bearing, press the measure button, and the measurement instrument will complete the measurement quickly. The measurement data are directly retrieved, displayed and saved by computer software.
Specially developed measurement control system, featuring a high speed processing unit and a performance of high stability and precision.

Technical Specification :

Special Weight Length Minus Tolerance Measuring With High Precision Test Equipment
