Product Name :
PLC with HMI Trainer Board

Product Code :
LBNY-0002-650002

Description :

PLC with HMI Trainer Board

Technical Specification :

PLC Input and output modules with a short circuit protection which completely isolates PLC and provides necessary freedom to participants to carry out PLC connections with ease.
Table mounted kit with ergonomically designed holding arrangement for easy pick up / placement.
Complete structure in powder coated mild steel to provide required rigidity.
Provision of Ethernet switch which enables other workstations to be connected to PLC-HMI kit with ease.
Indigenously designed Field Input and output modules which makes it easier for participants to connect the automation modules as well as to carry out ladder programming.
Ergonomically designed kit which makes it easier for three students to work at a time.
Use of all industrial components gives participants hands n experience on industrial automation as well as PLC – HMI integration

PLC with HMI Trainer Board, PLC with HMI Trainer Board Equipments, PLC with HMI Trainer Board Tools, PLC with HMI Trainer Board Tool Kits, PLC with HMI Trainer Board Manufacturers, PLC with HMI Trainer Board Suppliers from India, China, Kenya
