Product Name :Anaerobic Reactors Apparatus

Product Code:

Description:

Features:

Simple change of reactor configurations

Provision for sampling of liquids and gases

Automatic pH control with two dosing pumps

The reactors are made of glass so the contents are fully visible

Provision for fitting user supplied instrumentation

Very low back pressure on reactor from gas collector

Accurate control of temperature to suit the bacteria

Accurate and highly visual measurement of gas produced

Optional settling tank

Data logging system with software.

Technical Specification:

Anaerobic Reactors Apparatus

Laboratory Instrument India
