Product Name :
Research Cavitation Tunnel

Product Code :
LBNY-0005-1790002

Description :

The cavitation tunnel installed at the Laboratory for Hydraulic Machines provides high speed visualization of various types of cavitation phenomena, including leading edge cavitation, wake cavitation, and tip vortex :

- Cavitation nuclei control
- Pressure transducers
- High speed visualization
- 5 components load cell
- Optical instrumentation: particle image velocimetry, Laser Doppler velocimetry.

Technical Specification :

This is a Small Research Cavitation Tunnel with 3 different interchangeable measuring sections available:

- 425mm x 425mm Measuring Section Max Speed 5m/s
- 300mm x 300mm Measuring Section Max Speed 9m/s
- Measuring Section Max Speed 4m/s
- Asymmetric 630mm x 350mm.
