**Product Name :**  
Welding Technology Learning System

**Product Code :**  
LBNY-0005-1940001

**Description :**

Welding Technology Learning System consists of a workstation with a self-contained down-draft table and angle grinder, storage station, gas metal arc welder, weld test fixture, tools and fixtures, safety gear, student curriculum and teachers assessment guide.

The Welding Technology Learning System teaches how to safely create an array of high quality weld types. Welding plays a critical role throughout our economy. It is central to many industries including manufacturing, construction, and aerospace to name only a few. Welding is a blend of both art and science, joined together to create enduring bonds that allow us to create structures and machines on a scale impossible to achieve without it. The Welding Technology Learning System is mobile with both the workstation and storage unit designed for classroom use.

**Features:**

Mobile Technology Workstation with Vise  
Magnetic Stainless Steel Top Workstation  
Turnkey Storage Station.

**Technical Specification :**

Welding Technology Learning System
