Product Name :	**Product Code :**
Product Finishing Learning Systems	LBNY-0005-1940002

Description :

The Product Finishing Learning Systems includes real-world tools and components to ensure that learners are using the same quality of tools they will see in industry. The Product Finishing Learning Systems includes a two-sided workstation that is used to teach surface preparation skills that prepare parts for painting. Additionally, this system includes either an electrostatic liquid spray paint system, an electrostatic powder paint system, or both to provide hands-on training with industrial paint systems. Product Finishing Learning Systems allow learners to acquire vital industry skills in surface preparation and painting. Major topics covered by the Product Finishing Learning Systems include product finish inspection, sanding and scuffing, washing and pretreatment, masking and demasking, spray painting processes, electrostatic liquid spray painting, and electrostatic powder painting. The knowledge and hands-on experience learners will gain as they progress through this learning system will increase product quality while reducing rework and related costs.

Features:
Purchase Liquid Paint, Powder Paint, or Dual Liquid/Powder Paint System
Interactive Curriculum Provides In-depth Knowledge, Simulations, and Hands-On Skill Procedures
Electrostatic Spray Painting using Real-World Parts
Two-Sided Workstation
Masking Skills
Student Reference Guide
Sanding and Scuffing Skills.

Technical Specification :

Product Finishing Learning Systems

Laboratory Instrument India
