Product Name:

Torsion Experiment Kit

Product Code:

Description:

Effect of rod length, rod material and J value on angle oft wist. The Torsion Experiment Kit enables studentsto understand the relationship between torsion and the angle of twist for anygiven material.

Features:

Appliedstudent Learning via Building and experimentation

Hands-onLearning

Multipleexperimental capabilities per self-contained kit

Clear and concise pictorial assembly instructions enhance the learning experience

Tool-Lessassembly

Supplied with detailed instruction manual, covering the theory of Torsion including multiple practical experiments designed to further develop the students understanding in this field.

Technical Specification:

Overall Dimensions:

Tray:

Height: 0.430m Width: 0.312m Depth: 0.080m.
