Product Name :
Beams Experiment Kit

Product Code :
LBNY-0005-1980002

Description :

The Beams Experiment Kit enables students to analyse the behaviour of different types of beams under a variety of load conditions and also build and test a selection of portal and truss frames.

Features:

- Applied student Learning via Building and experimentation
- Clear and concise pictorial assembly instructions enhance the learning experience
- Multiple experimental capability per self-contained kit
- Supplied with a detailed instruction manual, covering the theory of beams including multiple practical experiments designed to further develop the students' understanding in this field
- Tool-less assembly
- Hands-on Learning.

Technical Specification :

Beams Experiment Kit
