**Product Name :**Beams Experiment Kit

Product Code: LBNY-0005-1980002

## **Description:**

The Beams ExperimentKit enables students to analyse the behaviour of different types of beams under avariety of load conditions and also build and test a selection of portal and truss frames.

## Features:

Appliedstudent Learning via Building and experimentation

Clear and concise pictorial assembly instructions enhance the learning experience

Multipleexperimental capability per self-contained kit

Supplied witha detailed instruction manual, covering the theory of beams including multiplepractical experiments designed to further develop the students understanding inthis field

Tool-Lessassembly

Hands-onLearning.

## **Technical Specification:**

Beams Experiment Kit

## **Laboratory Instrument India**
