Product Name :
Drinking Water Installation Demonstrator

Product Code :
LBNY-0006-2170002

Description :

Drinking Water Installation Demonstrator Educational Lab

Technical Specification :

A typical household drinking water installation is fitted to the panel.

A small electrical boiler for hot water and a circulation pipe with the related components demonstrate the heating of domestic hot water from the cold water supplied.

Safety devices show how the drinking water pipework is protected against the backflow of waste water.

A pipe system for draining the waste water is mounted on the back of the panel.
