Product Name :
Energy Control Strategy of Series-parallel Hybrid Power Vehicle

Product Code :
LBNY-0006-2190002

Description :

Energy Control Strategy of Series-parallel Hybrid Power Vehicle

Technical Specification :

The training equipment is designed based on the Corolla series-parallel hybrid power system working management control principle, dynamically demonstrate the several working conditions: starting, driving at low speed, normal speed, full speed and reduced speed and stopping of series-parallel hybrid power, the equipment is applicable for the teaching demands on theories and maintenance training of series-parallel hybrid power system.
