Product Name :
Full-Scale Sewerage System

Product Code :
LBNY-0006-2170004

Description :

Full-Scale Sewerage System Teaching Aid

Technical Specification :

The routing of sewers is particularly important in wastewater engineering. Pipe inclinations, pipe inlets and outlet, reducers and cross-sections must be considered when designing systems, taking into account interactions between the components. In particular, the pressure distribution in complex pipe systems places high demands on design engineers. Design errors lead to noise, empty drain traps and clogged pipes.
